PROFESSIONAL SUMMARY

Impact-driven Software Engineer and full-stack developer with a background in civil and environmental engineering. Proficient in developing modern web applications, integrating backend APIs, and building user-centric interfaces. Experienced in working with cross-functional teams on scalable digital products using cutting-edge technologies such as React, Vue.js, and Node.js.

EDUCATION

B.Eng. in Civil and Environmental Engineering — *University of Port Harcourt, Port Harcourt, Nigeria*

January 2023

Thesis: Development of Sustainable Interlocking Blocks Using Recycled Plastic Waste

- Received a cash prize for re-pitching the project during NYSC in recognition of innovation and sustainability.

Frontend Development — *SAIL Innovation Lab, Lagos, Nigeria*

January 2025

Full-Stack Engineer Certificate — *Codecademy, Lagos, Nigeria*

April 2025

EXPERIENCE

Full-Stack Developer (Full-Time) — *New Media Technology, Oregun, Lagos*

May 2025 – Present

- Led the full-stack development of digital products, building scalable frontend interfaces and backend services for fintech and e-commerce solutions.
- Successfully delivered an AI chatbot integration two weeks ahead of the project timeline, improving customer support and shopping assistance experience.
- Collaborated with external AI specialists as the company's lead developer to ensure seamless integration and successful project delivery.
- Developed secure RESTful APIs using Node.js and Express.js for a fashion e-commerce platform and produced comprehensive technical documentation.
- Entrusted with managing sensitive customer databases while maintaining data security, confidentiality, and system integrity.

Front-End & Full-Stack Engineer (Contract) — *Metnov Ltd (Tech Startup), Remote*

May 2025 – Jan 2026

- Developed the frontend of Wattwise, an intelligent electricity billing and expense management system that helps users track power consumption, calculate costs, and receive regulatory alerts and usage warnings.
- Integrated RESTful APIs to enable smooth communication between user interfaces and backend services.
- Designed and built responsive interfaces for AI-powered and utility management systems using modern frontend technologies.
- Developed a professional data analyst portfolio website using HTML, CSS, Tailwind CSS, and JavaScript.

Front-End Developer (Contract) — *XRP Ledger, Remote*

February 2024 – August 2024

- Collaborated with a cross-functional team to build a smart gas delivery platform that allows users to locate nearby gas stations through GPS and request doorstep gas delivery.
- Designed and developed the user interface to deliver a seamless and user-friendly customer experience.
- Integrated the Xaman blockchain payment API on the XRP Ledger, enabling secure, transparent, and efficient digital transactions.

PROJECT HIGHLIGHTS

Wattwise — Intelligent Electricity Billing & Expense Management System

Developed a smart electricity management platform that tracks power consumption, calculates energy costs, and provides real-time usage insights, regulatory notifications, and expense warnings to help users optimize electricity spending.

Fashion Redemption — AI-Powered E-commerce Fashion Platform

Built a user-friendly e-commerce platform featuring an AI shopping assistant to enhance customer decision-making, and integrated the Espees blockchain payment gateway to enable secure digital transactions.

SKILLS

Programming Languages & Tools: JavaScript, TypeScript, HTML, CSS, SQL, Git & GitHub

Frontend Technologies: React.js, Vue.js, Nuxt.js, Axios, RESTful APIs, Postman

Platforms & Back-End Tools: Node.js, Express.js, GitHub, Visual Studio Code, CTB (Critical Task Breakdown)
